

# Topanga Enrichment Programs Speaker Series Presents.... TAMSIN WOOLLEY-BARKER, PHD.

**Saturday, February 4, 2017**

**3:00-4:30 P.M**

**Topanga Library**

**122 N. Topanga Canyon  
Blvd.**

[Dr. Woolley-Barker](#) is an Evolutionary Biologist with an extensive background in leadership, innovation, and sustainability. She's also a pioneer in the emerging discipline of Biomimicry, working with a global clientele to provide bio-inspired solutions to all kinds of problems. How does the rest of nature do things? The answers are surprising and often transformative. She teaches at Arizona State University's Biomimicry Center, and is a regular contributor to AskingNature, the Biomimicry Institute's blog. Her column '[The Biomimicry Manual](#)' appears on Inhabitat, a digital magazine with over three million followers. Her book, [Teeming: How Superorganisms Work to Build Infinite Wealth in a Finite World](#), will be out in 2017.

Dr. Tamsin will teach us about how nature solves problems and discuss creative concepts from her groundbreaking book, *Teeming: How Superorganisms Work to Build Infinite Wealth in a Finite World*.
